

## VEHICLE ENERGY CREDIT

### Vehicles Certified for Hybrid Vehicle Credit

<i>Make / Model</i>	<i>2007 Credit</i>
<b>Chevrolet</b>	
Silverado 2WD Hybrid Pickup	\$250
Silverado 4WD Hybrid Pickup	\$650
<b>Ford</b>	
Escape 2WD Hybrid	\$2,600
Escape 4WD Hybrid	\$1,950
Mercury Mariner 4WD Hybrid	\$1,950
<b>GMC</b>	
Sierra 2WD Hybrid Pickup	\$250
Sierra 4WD Hybrid Pickup	\$650
<b>Honda</b>	
Accord Hybrid AT	\$650 *
Accord Hybrid AT w/ updated calibration	\$1,300
Accord Hybrid Navi	\$650 *
Accord Hybrid Navi w/ updated calibration	\$1,300
Civic Hybrid CVT	\$2,100 *
<b>Lexus</b>	
GS 450h (Hybrid)	\$775 *
RX400h 2WD (Hybrid)	\$1,100 *
RX400h 4WD (Hybrid)	\$1,100 *
<b>Nissan</b>	
Altima (Hybrid)	\$2,350
<b>Saturn</b>	
Aura (Hybrid)	\$1,300
Vue Green Line (Hybrid)	\$650
<b>Toyota</b>	
Camry Hybrid	\$1,300 *
Highlander 2WD Hybrid	\$1,300 *
Highlander 4WD Hybrid	\$1,300 *
Prius (Hybrid)	\$1,575 *

\*Credit is reduced. See us for details.

## ALTERNATIVE MOTOR VEHICLE CREDITS

- Only applies to new vehicle purchases.
- You generally won't be able to determine vehicle credit amounts on your own. We will have to rely on information provided by the auto manufacturer. Some credits are phased out, based on sales.

### 1. Hybrid Motor Vehicle Credit (expires after 2009)

- Vehicle must have an internal combustion engine and a rechargeable energy storage system.
- Phases out after manufacturer sells 60,000 units.

### 2. Advanced Lean Burn Technology Vehicle Credit (expires after 2010)

- Vehicle must be designed with an internal combustion engine that uses more air than necessary for complete combustion of the fuel, incorporates direct injection, and achieves at least 125% of the 2002 model year city fuel economy.
- Phases out after manufacturer sells 60,000 units.

### 3. Fuel Cell Motor Vehicle Credit

- Vehicle must convert chemical energy into electricity by combining oxygen with hydrogen.
- Credit ranges from \$8,000 for vehicles under 8,500 pounds, to \$40,000 for vehicles over 26,000 pounds.
- A conservation credit of \$1,000 to \$4,000 is also available.

### 4. Alternative Fuel Cell Motor Vehicle Credit (expires after 2010)

- Vehicle must be capable of operating on an alternative fuel (compressed natural gas, liquefied natural gas, liquefied petroleum gas, hydrogen or any liquid consisting of at least 85% methanol)
- Credit is up to 80% of the incremental cost of the alternative fuel technology.
- The incremental cost is limited to \$5,000 for vehicles less than 8,500 pounds, with higher limits for heavier vehicles.
